

POLYPLASTIKA

Connectors for Tubes 25 x 1,5

Tube connectors are made in:

Characteristic: Durable, Flexible, rigid, less moisture absorbing,

Color: Natural

Dimension: 90 x 22mm

Manufacturing method by: C & C cutting

HPME 500 (High Molecular Polyethylene) Is a very wear-resistant plastic, retains its shape, has a low coefficient of friction and does not absorb moisture. This makes it extremely suitable for suitable shapes. The material is very easy to process mechanically.
